

ONE HOME

× BNB CHAIN

Welcome Home.

A multichain consumer Web3 platform bringing identity, creators, games, physical products and participation into one persistent home.

BUILDER GRANT

\$50K

BNB-native expansion

Passport + wallet verification

Creator minting + claims

Participation + games

Physical ↔ digital ownership

BNB discovery inside One Home

Web3 still makes the user assemble the experience.

FRAGMENTATION

Different wallets, identities, marketplaces, games, communities and chain-specific interfaces.

THE COST

The technology works, but the consumer journey is still too complex. Mainstream users should not need to understand RPCs, bridges and token standards before participating.

One identity above the chains.

ONE HOME

One login. One profile. One dashboard. One Home.

PASSPORT

Persistent identity + verified wallets that can follow a person across supported ecosystems.

ROOMS

Games, creators, assets, community and physical-to-digital experiences become familiar entry points.

Already built. Already transacting.

PROOF

XRPL Mainnet Founder Supply Drop: 338 XRP. Three NFTs delivered through the production flow. Passport is live.

WORKING SYSTEMS

Verified wallets, creator minting, allowlists, inventory, claims, recovery, ownership views, royalties, participation and QR onboarding.

MULTICHAIN

Production XRPL plus development/integration work across Base, Polygon, Stellar, Ethereum, Cardano and Avalanche.

One Home is the front door.

CONSUMER EXPERIENCES

SHRUNK • WANDER • Bowling Buddies • Duckyverse
• 88 Squared • XRPL Home

ACQUISITION

A person can enter through a game, QR code, creator, physical product, local business or community experience — then become a resident.

A native BNB room — not another wallet logo.

IDENTITY

BNB-compatible wallet verification inside Passport.

CREATION

BNB-native assets, creator minting, claims, inventory and ownership.

PARTICIPATION

Games and physical products become consumer-facing BNB entry points.

Five steps to public BNB participation.

1-2

BNB Passport wallet connection + verification. Then creator minting, claims, inventory and allowlists.

3-4

Participation tickets, QR flows and community activity. Then games + physical-to-digital BNB assets.

5

Surface BNB creators, assets and open experiences through One Home discovery.

Acquire people through experiences, not token incentives.

ENTRY POINTS

Physical products • games • QR activations • creators
• local businesses • events • schools

MEASURABLE ACTIONS

Passport created • BNB wallet verified • asset
claimed/minted • experience completed • creator
discovered • resident returns

Revenue can begin before “crypto-native.”

PLATFORM + CREATORS

One Home allocation on supported digital asset activity and services; creator commerce, minting and collaborator structures.

PHYSICAL + EXPERIENCES

SHRUNK and other physical-to-digital products; games, premium experiences, events and community commerce.

Milestone-driven BNB expansion.

0-3 MONTHS

BNB Passport, wallet verification, chain infrastructure and closed testing.

3-6 MONTHS

Creator minting, claims, inventory, ownership and participation.

6-12 MONTHS

Consumer experiences, physical-to-digital BNB flows, creator onboarding, discovery, documentation and public release.

Small team. Protected execution.

TEAM

Brian “Rare” Baker — Founder / product / creative direction

Hollie “Ink” — Front-end / interface

G “JPEG Prince” — Backend / blockchain / XRPL engineering

RELEASE DISCIPLINE

Incremental chain integrations; automated regression verification; protected baselines; rollback checkpoints; production-build validation; real-device acceptance.

SECURITY

No claim of a completed third-party BNB audit. Independent security review of applicable BNB contracts/infrastructure is a pre-production milestone.

\$50,000 to make BNB Chain a first-class One Home ecosystem.

USE OF FUNDS

BNB engineering • wallet/Passport integration • asset + creator infrastructure • security/testing • participation • physical-to-digital • game integrations • production infrastructure • documentation

DELIVERABLE

A public One Home release where BNB users can establish identity, create and own assets, participate in experiences, discover creators and return through one persistent home.

WELCOME HOME.

Bring BNB Chain into the experiences people already want to use.

One login. One profile. One dashboard. One Home.
